

# ETC 9.0.2\_1 Release Notification

---

Dear Customer,

ETC version 9.0.2\_1 will be released on **August 28, 2020** for packaging and deployment to ETC users at your institution. Please note that this version of ETC has been approved for all global markets.

## Deployment Options

- ETC Sync
- ETC Download
- ETC Lite

### ETC Sync

ETC Sync will be delivered as an additional deployment option. ETC Sync allows customers to package and install once utilizing Numecent technology. Updates can be delivered by firm, by desk or even by user. Firm Admins via a portal can be set up so that customers can choose who and when to upgrade. Sync portal can be reached at:

<https://etcsync.icapcloud.com/> Logins will be emailed upon request.

### ETC Download version 9.0.2\_1

ETC version 9.0.2\_1 can be downloaded from the ICAP website <http://etc.icap.com/downloads/>

The credentials for this website are as follows:

Username: guest

Password: icapicap

The embedded Java for this application is 1.8.0\_31.

### ETC DESTINATION IP AND PORT

204.179.96.57 port 6254

12.161.244.57 port 6254

### ETC DR IP ADDRESS AND DR PORT

12.161.244.57 port 6254

### ETC Lite

ETC Lite is a cloud delivered front end trading solution. The application is fully accessible via a URL link <http://etc.icap.com/frontends/etcLite.html> and as such it will deliver the latest version of ETC Lite directly to the user's desktop. ETC Lite utilizes the customer's existing connection (Internet or direct line) over port 6254 but can also make use of an SSL encrypted session between the user and TP or ICAP on port 443. Java 1.6 or higher is

required to run ETC Lite. **Each individual user or proxy cache, whichever is applicable, will have to be cleared in order to take the new version.**

## ETC 9.0.2\_1 Release Notification

---
